Your neighbor's *new yard*

We just finished the **cedar fence down at the end of this street** — rails straight, gate true, boards crisp. If your yard's been quietly waiting on the same treatment, this is the moment to have it done right.

> **What we built for your neighbor:** fence, hardscape, and cleanup work designed and built for our freeze–thaw cycles — concrete and stone that don't heave, cedar that's sealed proper, and crews that leave the site cleaner than we found it.
